Observed through 100X telescope. Object sharply outlined. No sound. Color white. Like 2 ice cream cones stuck togather sideways. As big as average house. 2 holes in top. Appeared in SE disappeared in E. No evaluations. Looked like falling star.

11. COMMENTS
Additional data is conflicting. Impossible to follow object going at this speed with telescope. Also impossible to get this much detail. Basing observation on general impression as a "Shooting Star" case is evaluated as possible meteor.
